

## Panel Members

Valerie Beeson is a research scientist, widely published in the field of obesity and metabolism. She is an experienced medical educator and trainer, participating in numerous PGEA programmes on obesity management. As clinical programme director for Lipotrim, she is the primary liaison for practice and pharmacy staff; involved in the organisation of new programmes and ongoing support of all existing programmes.

Dr Stephen Kreitzman Ph.D, R. Nutr. is a nutritional biochemist. After training at the Massachusetts Institute of Technology (MIT) in the United States, he taught nutrition to medical and dental students in the US, researched obesity, body composition and metabolism in both the US and UK. He was also senior research associate at Cambridge University in the UK (retired) and a UK registered nutritionist.
